An antibody that binds to a PAL enzyme is useful for measuring the relative amount of PAL levels in a tissue. The polynucleotide sequences encoding PAL are useful in the preparation of plant expression constructs for modifying features of the response of a plant cell to wounding, damage or other injury from disease. Disruption or down-regulation of PAL activity
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Novel polynucleotide useful in preparing plant expression constructs to modify the response of a plant cell to wounding, damage or other injury from disease causing organisms or from plant pests
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     can be used to reduce the browning response to wounding in vegetable crops. The present sequence encodes lettuce LsPAL2 enzyme.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Sequence 2380 BF; 663 A, 548 C, 603 G; 566 T; 0 other;
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Claim 2; Fig 7; 46pp; English.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                  The sequence is that of the phenylalanine ammonia lyase (PAL) gene from Pisum sativum L. The gene may be used to produce PAL recombinantly. Plants contg. the PAL gene can contain a large amt. of phenyl propanoid isoflavonoid.
